

# Portable Folding Bars

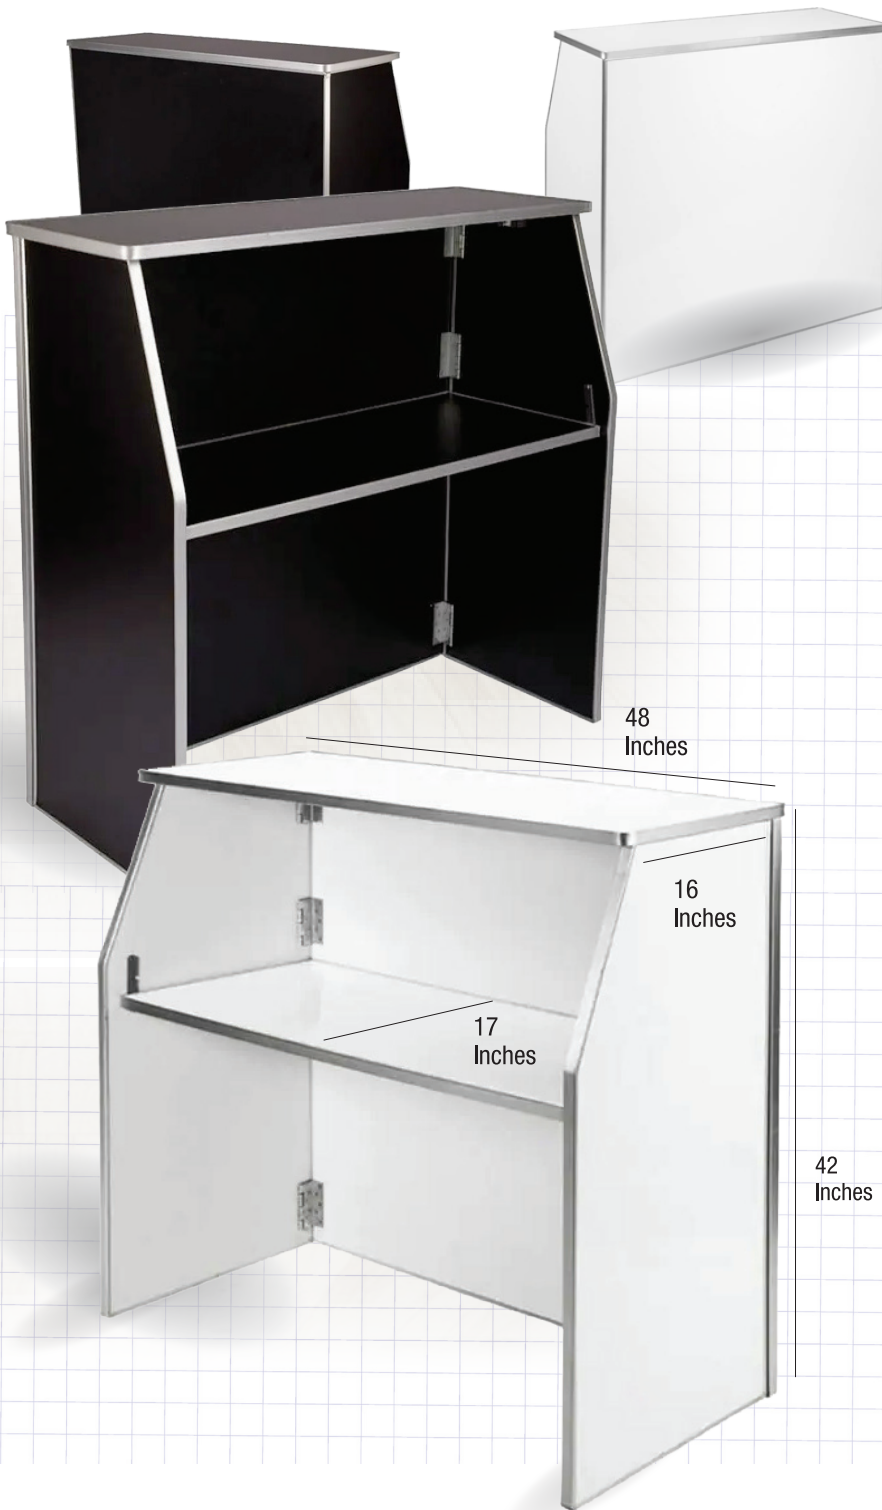

Rugged Okoume Plywood **EdgeMAX** Construction

Features an aluminum C-shaped protective edge that wraps around the table.

*Okoume plywood is made from sustainably grown and renewable lumber.*

**EDGE****MAX**

## The bar is open!

Increase your revenue by adding more bars and drink stations. During many events, there are time constrictions to sell beverages. Waiting lines to reach the bartender to order a drink is breaking the first rule in bar management. Add one or two bars and see your revenue skyrocket!

- Increase profits and reduce lines during peak beverage periods.
- This bar will likely pay for itself in a single use.
- Quick and Easy Setup
- Assembled, its a fully functional 48" long bar.
- Height: 42" (Industry standard bar height)
- Bar Depth: 16" (Plenty of room for napkins, straws, etc.)
- Shelf Depth: 17" (Plenty of room for bottles, ice and glasses)
- This bar separates into two pieces and then folds.
- Its foldable, portable and stores away in a small area.
- When folded its foot-print is only 49" x 43" x 5"
- The body of the bar is commercial grade plywood. The same as our banquet tables.
- The plywood is covered in durable Formica for easy cleaning
- Edges protected by a silver "C Channel" like our banquet tables.
- Weight: 92 lbs.
- Countertop Thickness: 0.75 inch
- Overall Dimensions : 49" x 43" x 5"

### More layers, more strength.

### OUR 11 WOOD LAYERS MAKE OUR TABLES STRONGER.

*Other tables with fewer layers cannot match the strength and stability of our 11 wood layers. With a smooth, elegant finish complimented by 2 layers of wood veneer and 5 layers of high quality polyurethane.*

*Our specially designed, high tensile Aluminum edge wraps around the entire table. This provides 2x protection during event set up and tear down.*
